

15,000,000 VEHICLES

HAVE BEEN PRODUCED AT ŠKODA AUTO'S PLANT IN MLADÁ BOLESLAV SINCE 1905

The Mladá Boleslav plant combines a long tradition of excellence with progressive manufacturing processes. The plant was modernised last year and contains **the Group's only production line on which both** the combustion engine vehicles (built on the MQB platform) and the ŠKODA ENYAQ iV (an all-electric car built on the new MEB platform) can be manufactured alongside one another.

In addition to producing 6 models, the Mladá Boleslav site manufactures engines, gearboxes, axles and high-voltage traction batteries for ŠKODA, as well as for other Volkswagen Group brands.

60%

of all ŠKODA vehicles (in operation worldwide) come from the Mladá Boleslav plant.

DID YOU KNOW... ?

The plant's new paint shop is one of the most environmentally friendly sites of its kind in Europe. By **recycling**

80% of air used for its operation, the paint shop substantially reduces its air treatment demands. And in comparison with the old paint shop, the emissions of organic substances are now 36% lower and the drying-relevant energy consumption has been reduced by 20%.

Manual gearboxes designated as MQ 100 and MQ 200

are part of Mladá Boleslav's long-standing production programme. Like traction batteries for plug-in hybrids, these manual gearboxes are used in a number of **models from other Volkswagen Group brands.**

Mladá Boleslav also manufactures traction batteries

for plug-in hybrids. In fact, the plant has produced **more than 100,000 batteries** of this type in the first 15 months since the production launch in 2019.

1905–2021

PRODUCTION HISTORY

Today, ŠKODA vehicles are manufactured near the original factory whose roots date back to 1898 – this is where Laurin & Klement started assembling their bicycles and motorcycles. Some of the original premises have been preserved and are currently used by the ŠKODA Museum.

1905

Laurin & Klement Voiturette A

The first car created by Laurin & Klement laid the foundations for ŠKODA AUTO's success.

1936

ŠKODA POPULAR Monte Carlo

The name of this stylish sports car highlights the brand's motorsport victories and achievements at the famous rally.

1964

ŠKODA 1000 MB

Czechoslovakia's first large-scale production car boasted an elegant body.

1996

ŠKODA OCTAVIA

The brand's bestseller and the first model produced under the umbrella of the VW Group: nearly 7 million cars have been made so far.

2020

ŠKODA ENYAQ iV

The first all-electric ŠKODA to be built on the new MEB platform which was designed exclusively for electric vehicles.
